

RIVETKING® RIVEX®

THE FOLLOWING PRODUCT IS COVERED UNDER THE FOLLOWING PATENT/TRADENAME: 3,504,672

HIGH STRENGTH MULTIGRIP™

The Rivex® is an advanced MultiGrip™ with increased performance and functionality as compared to standard steel MultiGrip™ rivets. It is also the only MultiGrip™ that is offered in stainless steel. Rivex® rivets consist of a wider grip range and a higher shear and tensile strength. The Rivex® rivet contains an easy entry mandrel head that is grooved and blunt pointed. Its design is rattle resistant and will break flush with the head in the ideal grip range. Its virtual closed end and flush mandrel break makes this rivet leak resistant.

AVAILABLE IN STEEL* AND STAINLESS STEEL
 * Steel Parts are plated with clear trivalent zinc
